

I feel XM Radio is awesome, and feel that it shouldn't be limited, if we weren't paying for the service then that would be a different story, but since we're paying 10 dollars a month to listen to it, we should have the right to listen to what we want without the NAB or anyone else preventing us from doing so. America was founded on freedom, and not found on lobbyists and campaign contributions to persuade congress to do things they shouldn't be. Why not focus on Iraq, gas prices, and other price increases then XM Radio? Then maybe the saying the opposite of progress is congress can be disproven.
